Prompt and Efficient Emergency Service •

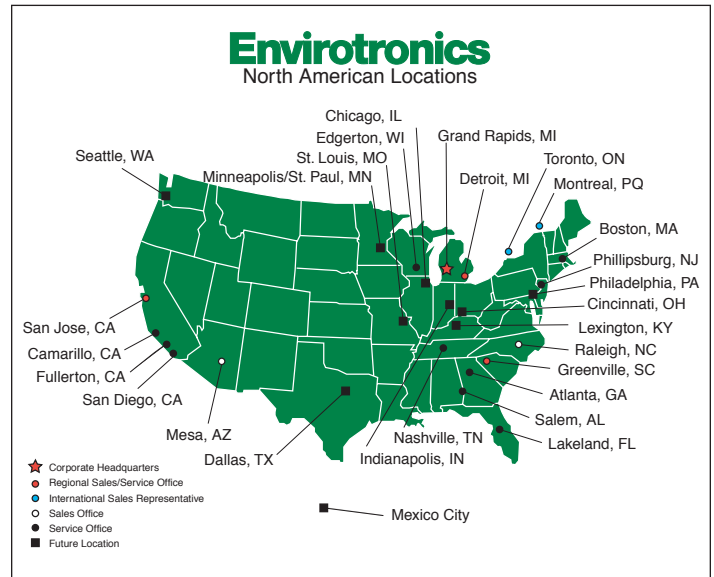

Envirotronics, an industry leader in the design and manufacture of environmental test chambers, has a dedicated service staff that provides complete product support and can provide emergency service on all makes and models of environmental test equipment.

Our strategically located service centers, staffed with experienced, factory-trained personnel, provide prompt and efficient emergency service. We can often provide same-day response to customer requests. Orders for replacement or spare parts received by 2:00 p.m. EST will be shipped the same day. Overnight and Saturday delivery is available.

Our Customer Support group operates through an international network of service centers. We provide product support through our corporate headquarters in Grand Rapids, Michigan, and regional service offices located in major business centers throughout the United States and abroad.

We do a lot more than repair equipment. Envirotronics provides turnkey installation of both new and used environmental test equipment. We offer instrumentation upgrades, A2LA accredited calibrations, and refrigerant modifications. We also provide preventive maintenance to keep your chamber performing to its full potential year-after-year.

As with all aspects of the Customer Support Program, these services are available for Envirotronics test chambers as well as those built by other manufacturers. Please contact our Customer Support Group for additional information.
